

Northern Light® GII PTO Cap Lamp

Power a secondary device

The original Northern Light® GII Power Take-off (PTO) cap lamp provides the quality and reliability of the original GII cap lamp but with additional functionality; the GII PTO can power secondary devices such as a remote controls, air filter helmets or VoIP handsets.

The GII PTO reduces the amount of equipment workers have to carry while providing the added security of a back-up battery source. The GII PTO is available with a primary incandescent bulb or LED and is powered by a NiMH battery.

Features

- ❑ Powers a secondary device
- ❑ Low voltage flasher circuit to alert user of low battery power
- ❑ New 360° Switch
- ❑ Ergonomic kidney-shaped design
- ❑ Improved, resilient strain relief

Benefits

- ❑ Reduces equipment needs by powering multiple devices
- ❑ Provides extra security by offering back-up battery source
- ❑ Available with Incandescent or LED headpiece
- ❑ Rated Intrinsically-safe (IS)

Technical Specifications*

Battery

Type:	NiMH
Voltage:	5 to 7.5 V
Life Span:	> 500 Charging Cycles
Charge Time:	<10 hours
Discharge Time:	>12 hours
Weight:	1195 grams or 2.6lbs

Lighting Incandescent

Primary Light Source:	Incandescent bulb
Primary Lux:	3,000 typical
Secondary Light Type:	5mm LED
Secondary Light Output:	22,000 mcd
Secondary Light Lux:	200

Lighting LED

Primary Light Source:	1 Watt LED
Secondary Light Source:	LED
Lumens:	72.2 typical
LUX:	3,000 typical
Life span:	> 10,000 hours
