

Electronics or Electromechanical Technician Summer Student

About Northern Light Technologies (NLT)

NLT is a turn-key partner in the design, manufacture, deployment, and support of scalable communication technologies that is changing the way mines and tunnels communicate, collaborate, and operate.

Job Description

This is an opportunity to use your electronics or electromechanical skills to participate in the development and testing of our innovative cap lamp and computer network products.

DUTIES

- Coordinate build of prototypes, with hands-on involvement
- Testing NLT cap lamps and network products
- Write test reports summarizing results of tests
- Research components and technologies and find cost effective suppliers
- Assist engineering with documentation and various support duties

QUALIFICATIONS

- Minimum 2 Years in a Technician, Technologist or Engineering program in Electronics or Electromechanical field.
- Strong foundation in electronics circuits
- Excellent soldering skills
- Experience building electromechanical assemblies
- Proficient in MS Office including Excel
- Must have very good written and oral communication skills.
- Computer network knowledge preferred

How to Apply

Our online application will give you the option to apply to this role as a complete candidate and not just a resume.

Apply at: <https://www.fitzii.com/apply/18169?s=c4>

The application will assess your qualifications, personality traits and workplace preferences, and should take 10 to 15 minutes to complete. You can get a copy of your assessment when you're done by logging back into the application tool.

If you require any accommodation in the application process, please contact us with the "Need Help" button in the application. We will review applications as they are received and look forward to hearing from you.
