

Northern Light® Eagle Cap Lamp

The next generation in technology-enabled cap lamps

The Northern Light® Eagle cap lamp is an IP67, Proximity Warning ready and Wi-Fi tag enabled semi-corded cap lamp with best in class LED and lithium-ion battery technology. The Eagle cap lamp has a headpiece connected via a lamp cord to a high powered battery pack that can be configured for 1 or 2 cells and is mounted on the back of the hard hat. The headpiece has 3 pushbuttons and is designed for integration with IoT technology.

Features of the NLT Eagle:

- Base model includes Wi-Fi tracking and blue flashing tail-light. Proximity electronics options available via select NLT partners (contact for more info)
- **3 pushbuttons** – 1 pushbutton to control the light and 2 side pushbuttons for third-party integration.
- **Low profile battery pack** worn on the back of the hard hat for improved weight distribution and ergonomics.
- Designed to house and power a **Wi-Fi or RFID tag** for location tracking of personnel and access control.
- **Blue LED** on the battery pack. Rear-facing "tail-light" enables visibility of the user from behind.
- **Online/Offline** indicator (Proximity model only).
- **Acknowledgement** of evacuation notifications. (Proximity model only).
- Any **NLT charging infrastructure** can be retrofitted for the NLT Eagle.

Note: Technical specifications are subject to change without notice.

Model	Cell Capacity	Lux output	Discharge time	Weight
1-cell	3.35Ah	8500 lux (typical)	12hr (min)	300g
2-cell	5.2Ah	12500 lux (typical)	12hr (min)	337g
