

# N-Connex Inline Adapters

For Seamless System Integration

Easily integrate your existing system with NLT's N-Connex platform using our inline adapters. These solutions support plug-and-play mounting of network devices – such as Cisco APs, MOXA APs and network cameras – for seamless compatibility with N-Connex ruggedized IP67 switches.

Need something specific? We can also design and manufacture custom adapters tailored to your current infrastructure.

Inline Adapter for MOXA AP DT5905SA

Cisco Inline Adapter DT5902SA

M-12 X-Coded Cisco Inline Adapter DT5903SA

Inline Adapter for Cameras DT5904SA

*“These connectors are built to last, and any failures we see are usually due to field handling rather than design. When needed, we simply replace them, and we're back up and running. Their integration with our plug-and-play system has been a game changer—it takes the complexity out of the equation. The final connection is crucial to getting our system running, and with this setup, our workers get the job done without relying on technical staff.”*

*– Bruno Battocchio, Glencore's Kidd Mine*
